

# Buitenplaats Vaeshartelt Integrates BenQ Presentation Solutions into Rustic Estate

## Facts at a Glance

**Segment:** Hospitality

**Year of Completion:** 2019

### Project

Buitenplaats Vaeshartelt installs new displays and wireless presentation technology in its conference rooms.

### BenQ Solution Used

- BenQ RM7501K 4K UHD 75" Interactive Flat Panel Display
- BenQ BlueCore Laser Projector
- BenQ InstaShow WDC20 Wireless

## Issue

The staff at Buitenplaats Vaeshartelt wanted to renovate its conference facilities so that guests would be able to enjoy the estate's relaxing, bucolic atmosphere while also benefiting from access to fully modern business amenities and meeting spaces.

## Solution

BenQ was one of the few vendors able to provide all the necessary technology, including interactive displays, projectors, and wireless presentation solutions. This streamlined the renovation process and facilitated easy integration into existing spaces.

## Result

Thus far Vaeshartelt's experience with BenQ has been all positives. From price and performance to ease-of-use and reliability, BenQ's displays and InstaShow have exceeded expectations. Perhaps most tellingly, guests at Buitenplaats Vaeshartelt have gone on the record about their great experiences with the new conference room equipment. The director of Buitenplaats Vaeshartelt, Paul Janmaat, remarked that "Users are really surprised [by] the easiness of the touchscreens. They use it in a very natural way." For Mr. Janmaat and the rest of the staff at Buitenplaats Vaeshartelt, seeing the smiles on guests' faces during and after presentations has made the entire renovation worth it.
