

Make Your Distance Learning a Success with Google Jamboard

What will be the best distance learning tool for educators while everyone is still at home due to COVID-19? While shifting their classroom to a digital one, many educators require a tool that could help them deliver their content, engage with the students and provide meaningful connections in an easy way. More than that, the educators also face challenges on how to give feedback to their students digitally and centrally control student assignments.

4 Reasons Google Jamboard is the Digital Whiteboard for Education Collaboration

100% GOOGLE ECOSYSTEM

Work with Google Classroom for distributing assignments or use Meet to arrange video conferencing with students.

SMART FEATURES

The Auto Draw / Sticky note functions allow you to share creative ideas to participants.

BETTER COLLABORATION

With the board to board collaboration feature, people can have seamless group discussion and idea sharing. All the information will be automatically saved to the Cloud Drive.

EASE OF DISTANCE LEARNING

By using the Jam App, it allows you to arrange Jam sessions via different devices such as laptops or tablets. The Jam file can also be pushed to a Jamboard for further editing or discussion. You may also present your assignment over its embedded video conferencing solution - Meet for Jamboard.
