

Cleaning and caring for your Interactive Flat Panel

Coated with nano-ionic silver agent, the antibacterial screen of the BenQ DuoBoard CP Series reduces the spread of bacteria, even after heavy use and cleaning.

Follow these steps for careful ongoing cleaning of your display to ensure it remains protected.

You will need:

- 1 Disposable Gloves

- 2 2x Lint-free microfiber cloths

- 3 Spray bottle 70% isopropyl alcohol

Step by step:

- 1 Power off IFP

- 2 Put on gloves

- 3 Wipe screen with dry cloth

- 4 Spray second cloth with alcohol

- 5 Wipe screen & accessories

- 6 Discard gloves and cloths

Never:

Use paper towels or anything that could scratch the screen

Spray anything directly onto the screen

Moisten the microfiber cloths

Use harsh chemicals or ammonia based glass cleaners
